DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

In the previous response to the Office action of 10/1/03 the applicant elected Group I out of the VI total inventions. This election is responsive to the previous restriction requirement. However, there are distinct species claimed. The applicant has elected claims 1-7, 47-64, 70-85, and 98-101.

As the examiner views the claims, claims

- A) 1-7 are drawn to the tissue folding device of figure 2A.
- B) 47-64 are drawn to the tissue folding device of figure 9.
- C) 70-85 are drawn to the tissue folding device of figure 5.
- D) 98-101 are drawn to the tissue folding device of figure 26.

Applicant should elect one species of tissue folder A, B, C, or D.

Additionally, if applicant elects species B) applicant should elect either an integral structure or an attached structure (claims 59 and 60 appear to read on each embodiment respectively).

Finally, it is the applicant's responsibility to recite the claims the applicant feels reads on the elected invention. Applicant should either concur or argue with the examiner's interpretation of which claims read on the elected invention.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none appear generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention. A telephone call was made to Roland McAndrews on January 5th, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
